System Overview

The BioUltra series 2MP Starlight Facial Recognition Cameras offer computer vision technology at the edge-performing complex real-time facial recognition and facial feature comparison without the need for an external face database. With embedded face recognition algorithm, the cameras could accurately capture and recognize faces comparing to the face templates in database. It also supports White/Black list event alarm deployment in different scenarios.

Meanwhile, benefited from outstanding Sony STARVIS sensor and ISP optimization, it's capable of balancing light throughout the scene and promising crystal-clear images in dark environment.

The cameras also support multiple industry-leading Intelligent video analytic functions, such as Face Detection, Line Crossing, Intrusion, Object Left/Lost, Counting, etc. for smart event alarms.

Cloud function is built-in for every device which is more convenient and flexible for remote real-time viewing. The BioUltra series IP cameras also supports registration of face templates remotely from the mobile Application AntarView Pro which provides great convenient user experience.

Functions

H.265+

H.265+ technology is an evolutionary optimization of the H.265 and traditional H.264, it includes a series of encoding strategy such as dynamic ROI, smart 2D&3D noise reduction, etc, for delivering high quality video, as well as greatly saving up to 70% bandwidth and storage.

Protection

With precise mechanical and rugged metal casing design, BioUltra series IP cameras could stand against water and dust with industrial IP67 rank.

Supports ±10% input voltage tolerance, the cameras could work safely in extreme unstable power conditions.

With working temperature range -30°C to +60 °C, the cameras could be used in a variety of harsh outdoor environments.
