

## ZK-LPR Car ID

License Plate Recognition Camera

## ZK-LPR Car ID is based on BL-852Q38A-LP, ZKTeco's high-performance camera with embedded License Plate Recognition application.

The license plate recognition algorithm is executed inside the camera avoiding the use of computers in access control, tolling and weighing scenarios. The License Plate Recognition engine can identify license plates from over 80 countries around the world.

ZK-LPR Car ID is next step in ZKTeco's access control system technology for an efficient and simple vehicle access management, delivering, faster & easier set-up and allowing customers to achieve high performance with lower installation, maintenance and off-site programming costs.

Supports 3rd party

integration (Milestone

and Lenel)

Allows integration with server / cloud based solutions

LPR software embedded in the camera

OCR conversion directly in the camera

Access lists for multiple events configuration

Scalable solution with primary / secondary cameras

Identifies plates from more than 80 countries

#### **Live View**

ZK-LPR Car ID allows real-time monitoring of alphanumeric license plates captured by the camera, issuing reports with plate recognition data. Optimized memory storage available.

# Monitor and review license plate recognition history data

The licences plate recognition history data can be stored for retrieval and review. Different filters can be enabled for this purpuse, such as: Date, time, country of origin.

#### Configure lists and linkage actions

The system allows to create an unlimited number of event lists and assign different actions like, for example, opening/closing barriers sending a signal via HTTP or simple integrations with 3rd party companies like Milestone or Lenel. All linkages can be activated by limited time periods and lists can be exported or imported from other devices.

#### LPR Configuration

The system supports plate detection from different regions and countries. Country license plate detection is configurable as well as the performance of the camera according to the environment.

### **Recognition features**

- 98% or bigger reliability rating on LPR
- Recognition of 2-line vehicle plates
- Duplicated license plate filtering
- Access Control Linkage with ZKTeco Parking barriers
- LPR from vehicles in movement (up to 20 km/h) or stopped (Stop & Go).
