System Overview

The BioX Series of Advanced Algorithm IP Cameras offer computer vision technology with edge-performing complex real-time intelligent functions.

It is capable of providing multiple industry-leading intelligent video analytic functions, such as Face Detection, Line Crossing, Intrusion, Counting, Rapid Movement, Queue Detection, etc.

The false alarm filter function could effectively filter out the leaves, shadow motions and only focus on main targets such as human and vehicle movement.

Meanwhile, the series benefits from the powerful 1 TOPS chipset and ISP optimization and performs excellently in weak/strong light comparison and foggy scenarios to deliver the promising crystal-clear images.

Functions

H.265
Extra H.265 encoding could save 50% bandwidth and storage capacity at least.

On-board Edge Storage Function
Support up to 256GB massive data storage on board when used as standalone devices.

Protection
The BioX series is rated IP67, which means it could stand against water and dust for a long time with its precise mechanical and durable materials.
With 10% of input voltage tolerance, the cameras could work safely under extreme or unstable power conditions.
With a working temperature range from -30℃ to 55℃, the cameras could adapt to various harsh outdoor environments.
